# QUIZ \#10: CALCULUS 1A (Stankova) 

Wednesday, April 7, 2004
Section 10:00-11:00 (Voight)
Name:

Please complete the following problem(s) in the space provided. You may not use a calculator. You will have 15 minutes to complete the quiz.

Please include all relevant intermediate calculations and explain your work when appropriate.

Problem 1. Find two numbers whose product is 4 and for which the sum of their squares is a minimum.

# QUIZ \#10: CALCULUS 1A (Stankova) 

Wednesday, April 7, 2004
Section 11:00-12:00 (Voight)
Name:

Please complete the following problem(s) in the space provided. You may not use a calculator. You will have 15 minutes to complete the quiz.

Please include all relevant intermediate calculations and explain your work when appropriate.

Problem 1. Consider the cost function

$$
C(x)=16+x^{3} .
$$

given in millions of dollars.
(a) At what production level $x$ is the average cost minimal?
(b) Let

$$
p(x)=36-3 x-x^{2}
$$

be the demand function. At what production level $x$ is the profit maximal? What is the maximum profit?
